## PROFESSIONAL PROFILE

Banking and Financial Services graduate with professional experience at Exxonim Company Limited spanning business operations, finance and accounting support, data and reporting, and the development of digital business solutions. Combines practical banking exposure in customer service and transaction support with hands-on experience building websites, web applications, business systems and Android apps. Has developed and published mobile applications and works across business requirements, operational workflows and technology implementation. Brings a business-first perspective to digital financial services: understanding customer and operational needs while being able to work with the systems that support them.

## CORE PROFESSIONAL CAPABILITIES

| | |
|---|---|
| **Banking and financial services** | Customer service; front-office and teller support; transaction processing; account-related enquiries; banking documentation; compliance procedures. |
| **Finance and business operations** | Budget and expenditure support; accounting operations; financial records and reporting; internal audit support; operational analysis; process improvement. |
| **Digital business solutions** | Website and web application development; Android app development; business and administration systems; database-backed workflows; APIs; troubleshooting and testing. |
| **Data and decision support** | Excel analysis; PivotTables; Power Query; Power BI; Oracle Analytics; SQL; Python-based data analysis and structured reporting. |

## PROFESSIONAL EXPERIENCE

**Software Development and Business Operations** — Exxonim Company Limited
January 2025 to present · Dar es Salaam, Tanzania

- Develop and improve websites, web applications, Android applications and internal business systems, translating business needs into practical digital services and workflows.
- Contribute to business and administrative platforms covering operations, records, finance and accounting processes, reporting and management workflows.
- Build database-backed features and backend functionality; connect user-facing interfaces with application services and business data; test, troubleshoot and refine system behaviour.
- Support finance and operational activities, including budgets, expenditure tracking, accounting records, financial and operational analysis, internal reporting and audit-related processes.
- Work with stakeholders to understand requirements, identify process gaps and improve usability, accuracy and operational efficiency through systems and structured reporting.

**Banking Intern** — Tanzania Commercial Bank
July 2024 to September 2024 · Dar es Salaam, Tanzania

- Supported customer service, front-office activities and teller operations, including responding to customer enquiries and assisting with account-related services.
- Assisted with daily transaction processing, back-office book balancing, customer documentation and service delivery.
- Followed banking procedures and supported accurate records and compliance-related documentation.

## EDUCATION

**Bachelor of Commerce in Banking and Financial Services** — University of Dar es Salaam
September 2022 to October 2025

**Bachelor of Science in Computer Science (in progress)** — University of the People, online
September 2025 to expected August 2027

## SELECTED PROJECTS AND DIGITAL PORTFOLIO

**MangiPlus** · SME-focused Android application
Developed and published an SME-focused mobile application, available on Google Play.

**LigiPlay** · eFootball competition platform
Developed and published an Android application for organising eFootball leagues and competitions, including fixtures, standings, match reporting and result-verification workflows. Built with Flutter/Dart and a FastAPI/PostgreSQL backend.

**Websites** · consult.exxonim.tz and levo.or.tz
Websites for Exxonim Consult (business setup, compliance and permits in Tanzania) and Legal Vision Organization, LEVO (legal aid, legal education and advocacy).

**Private and client projects**
Additional websites, business systems and internal or client applications are not publicly linked because some work is private or confidential.
